

20th May, 2008

Ken and the team at AON Financial Planning have been providing us with financial advice for the past twelve months and based on our experience we would confidently recommend their services.

As small business owners, Ken has made some important changes to our financial set up. The two most significant being the coverage our insurances provided and the restructuring of our superannuation plans.

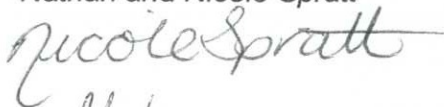

Prior to Kens counsel, we were grossly underinsured and would have been in major financial difficulties if we had of encountered an accident - usually something you discover once it is too late!

Our long term financial security has also been affected. We both had several superannuation plans with different companies and none of them were set up to provide us with maximum returns. Ken and his team compiled and organised all the paperwork to consolidate our plans and ensure they were set up adequately.

Ken and the team are always professional, provide a great service and we feel comfortable asking questions. They go above and beyond the call of duty coming to our house to counsel well after business hours, sending inspiring DVDs to watch and even thinking of us when our son was born with a beautiful gift.

We look forward to a long relationship with Ken and the team and would strongly recommend their services to anyone, looking for financial planning advice.

Nathan and Nicole Spratt
